- 102 The Endnote to End All Endnotes
- 103 NCGR Board of Directors and NCGR Chapters

About the Cover Artist

David A. Hardy, FBIS, FIAAA is the longest established astronomical artist on Planet Earth, with his art first appearing in print in 1952. He illustrated his first book, for Sir Patrick Moore, in 1954, and has now produced many books of his own. For full details, please see www.astroart.org. An aside to all you folks prone to contemplating the Art vs. Life conundrum * - he was actually there on Easter Island for the July 11, 2010 eclipse. DH was born on April 10, 1936 in Birmingham, England, birth time unknown.

*You know, does Art imitate Life or does Life imitate Art? Oscar Wilde famously weighed in on this debate in 1889 when he asserted, 'Life imitates Art far more than Art imitates Life'. In other words, our exposure to art often affects the way we look at the world around us.
